

Harmony Unify AP Mesh & IoT Cloud TR-069 Basis

1. Introduction of Harmony Unify AP Mesh & IoT Cloud
2. Harmony AP Mesh Scenario
3. Harmony Cloud Management System/ CMS for call center
4. Harmony Mobile APP
5. Harmony Product Line Up

Before, the ISP Call Center cannot have any clue for the subscriber's home WiFi network, only the Gateway to the Internet status can be detected...

HARMONY 2.0 is a TR-069 integrated, Telco-centric Managed WiFi Mesh solution.

Now, the Call Center can understand their subscriber's problem just as they are sitting in the user's living room.

Why it's So Important

THE WIFI EXPERIENCE IS THE INTERNET EXPERIENCE

Service Providers typically support WiFi issues
EVEN if they did not sell, lease, or install the equipment.

Resulting in...

Increased Support
Calls

Increased Truck Rolls

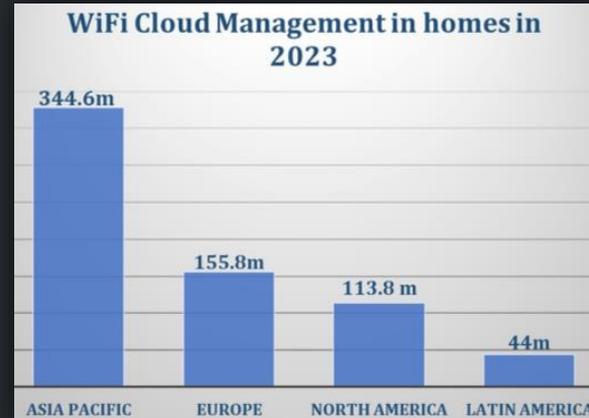

Reduced
Customer Retention

Why it's So Important

364 million homes could have multi-AP WiFi

- By 2023, cloud management software will control 658 million Wi-Fi homes, some 364 million of those homes will have more than a single access point.
 - Currently, 46 million homes that have **managed Wi-Fi** and 16.8 million have multiple access points installed.
 - Wi-Fi will move from the 50 Mbps service today to reach at least a 500 Mbps signal.
- “There is something of a revolution quietly through the broadband operators, with the potential to upgrade at least one billion homes with Home Gateway and cloud software.”
- Today most operator activity is about putting in cloud management software and extra Access Points into each home, rather than simply shifting to 802.11AX.

Remote Management for the Subscriber's Wi-Fi Configurations

The screenshot displays the Harmony CMS interface for managing a subscriber's Wi-Fi configurations. The interface is dark-themed and includes a top navigation bar with the following elements:

- HARMONY** logo and "CTACS Demo 100M/100M" status.
- Navigation tabs: Network Topology, Connection Quality, **Mesh Node List** (active), User Device Statistics, and Parental Control.

Below the navigation bar, a breadcrumb trail reads: **Harmony / Mash Node List / Settings**.

The main content area is divided into two panels for different frequency bands:

- 2.4GHz Panel:**
 - WiFi On/Off:
 - SSID:
 - Password: [Change Password](#)
 - Channel:
- 5GHz Panel:**
 - WiFi On/Off:
 - SSID:
 - Password: [Change Password](#)
 - Channel:

At the bottom of the interface, there are two buttons: **Back** and **Submit**.

Consideration Service: Reset the Messed-up Configurations

The screenshot displays the HARMONY CMS interface for Parental Control. The top navigation bar includes the HARMONY logo, the text "CTACS Demo 100M/100M", and several menu items: Network Topology, Connection Quality, Mesh Node List, User Device Statistics, and Parental Control. Below the navigation bar, the breadcrumb "Harmony / Parental Control" is visible. The main content area features a table with the following columns: Rule, Device MAC, Deny Access, Start Time, End Time, and Rule Status. Two rules are listed: "SonWii" with MAC "60:6c:8f:5a:ea:3e" and "DadNB" with MAC "56:da:38:72:0d:61". The "Deny Access" column uses a 7-day calendar grid where red circles indicate active deny periods. The "SonWii" rule is active from 08:00 to 16:00 on Saturdays and Sundays. The "DadNB" rule is active from 18:00 to 21:00 on Thursdays, Fridays, and Saturdays. A "Clear All Rules" button is located at the bottom of the table.

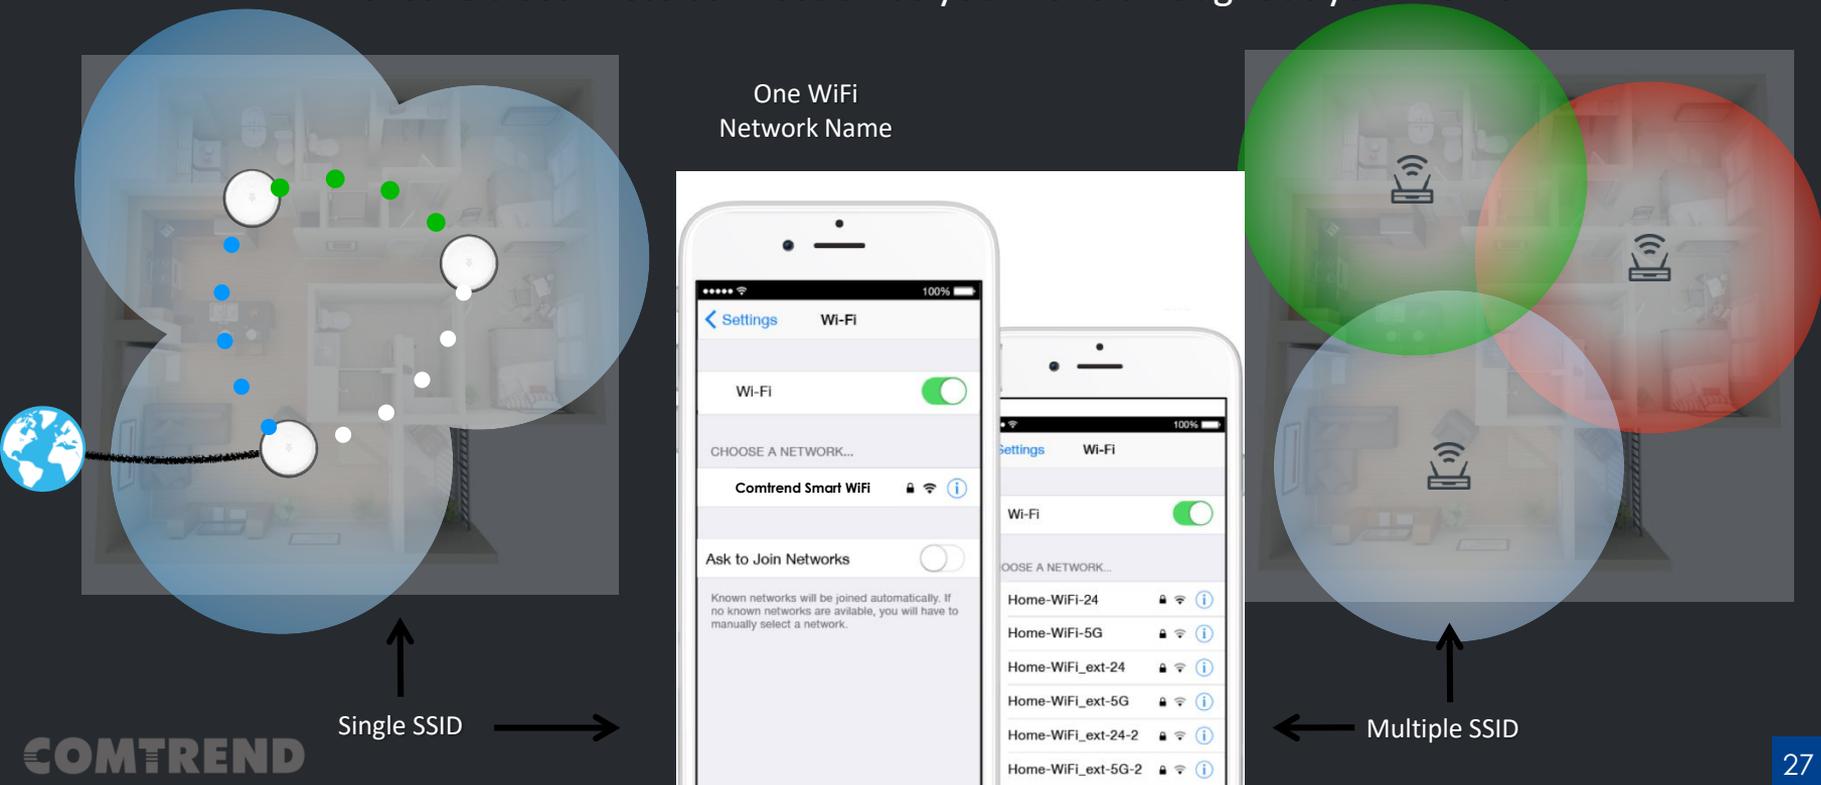

Rule	Device MAC	Deny Access	Start Time	End Time	Rule Status
SonWii	60:6c:8f:5a:ea:3e	S M T W T F S	08:00	16:00	Enable
DadNB	56:da:38:72:0d:61	S M T W T F S	18:00	21:00	Disable

A Single, Seamless Wi-Fi Experience

The Smart WiFi mesh system operates as a singular network that works to ensure a seamless connection as you move throughout your home.

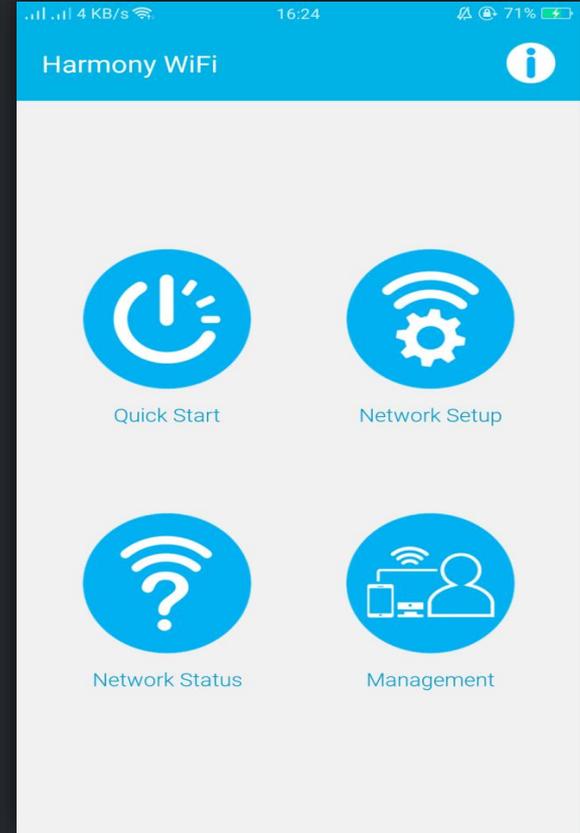

Get Harmony Wi-Fi App

1. Download Harmony Wi-fi App from Google play store or Apple Store.

Connect to Harmony device

1. Connecting smart phone Wi-Fi to Harmony device.
2. Open Harmony Wi-Fi App.

Checking Basic environment & setting

3. Login the Selected management CPE

Account : root

Password: 12345

Login

Please login to the Harmony gateway

root

Keep the login information

< ✓

Harmony cloud MESH

4. Enter Network Setup

After login selected management CPE, you can enter Network Setup page to select which Wi-Fi device you want to management.

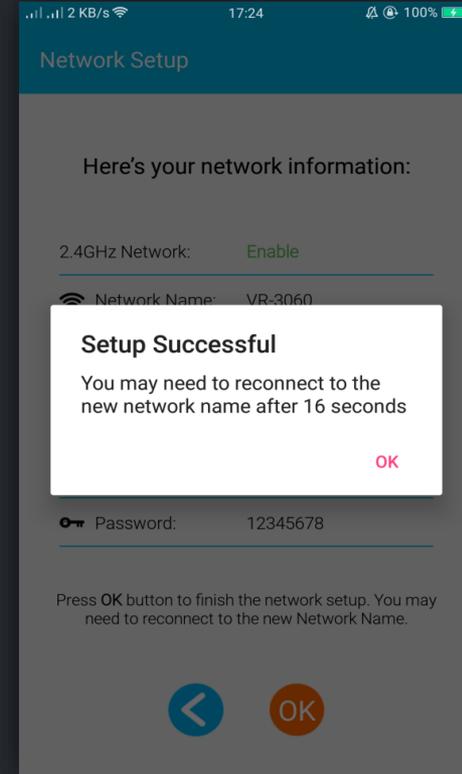

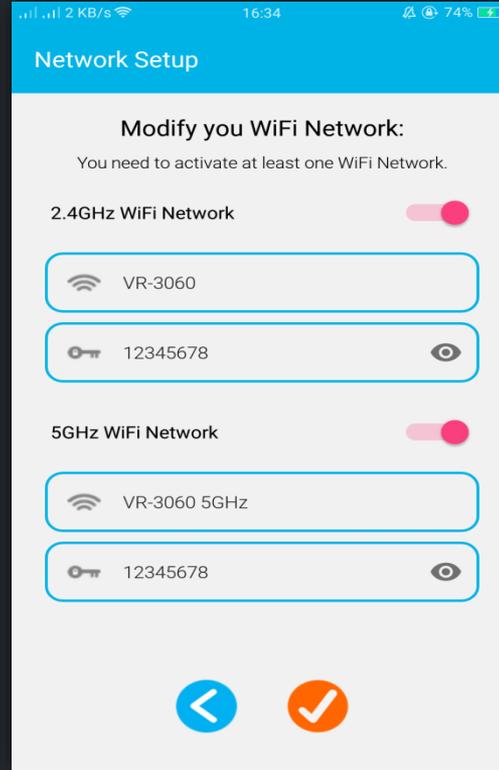

Harmony cloud MESH

5. Showing App management

In this page you can showing

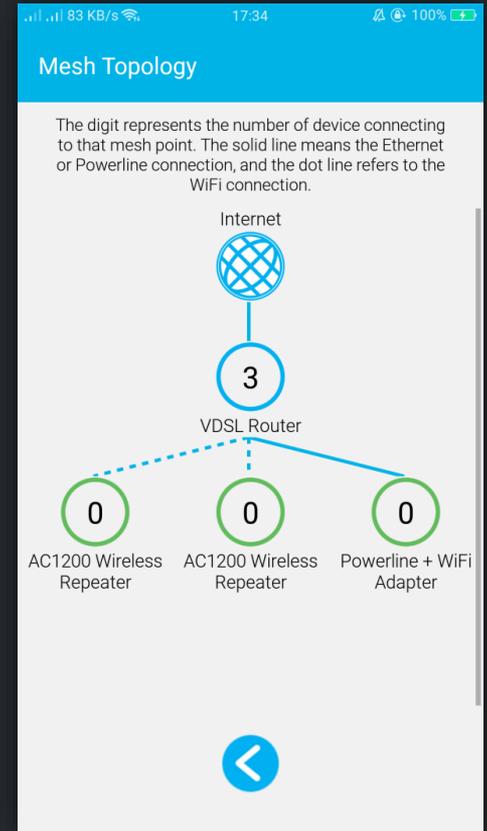

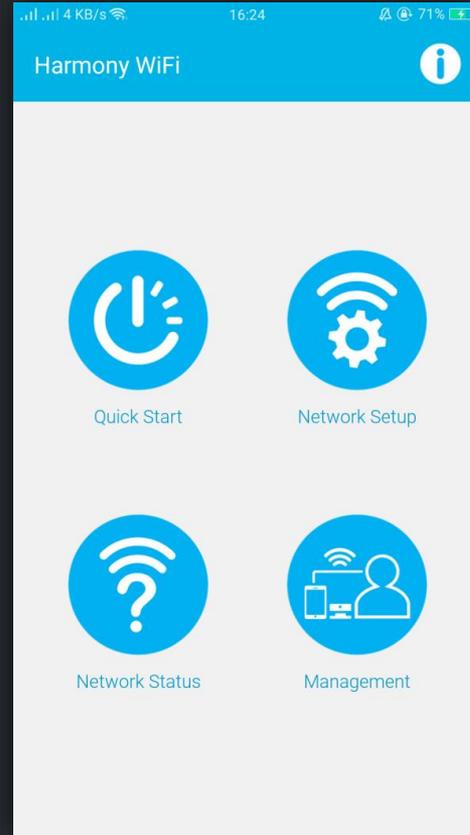

1. Enable or disable WiFi Network.
2. Change SSID.
3. Change Wi-Fi Password.

Harmony cloud MESH

6. Showing Network Status

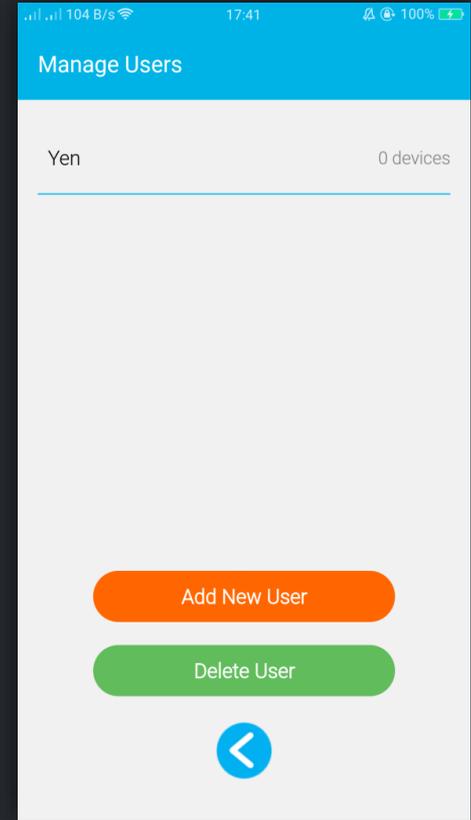

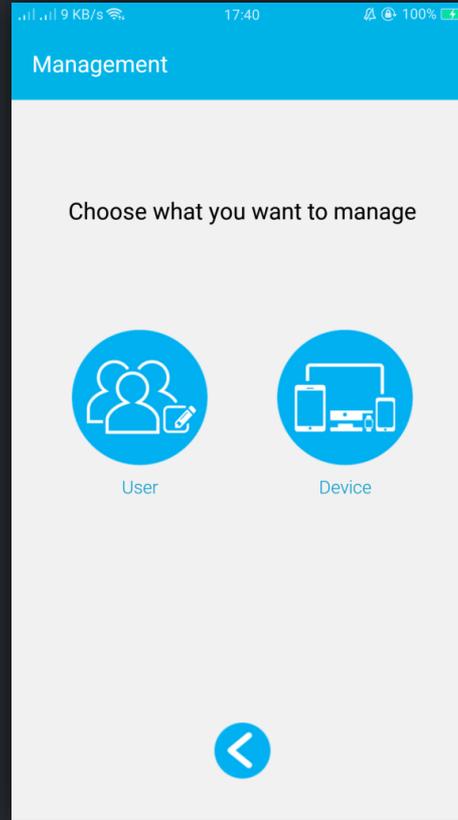

You can enter Network Status to show current Mesh Topology.

Harmony cloud MESH

7. Management Device and User

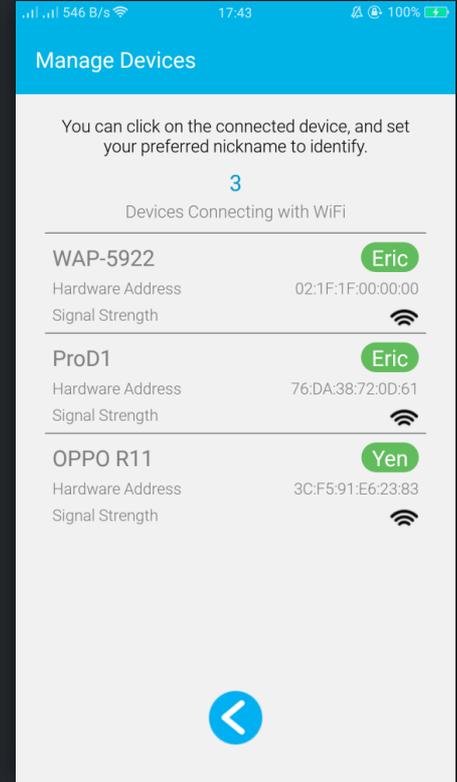

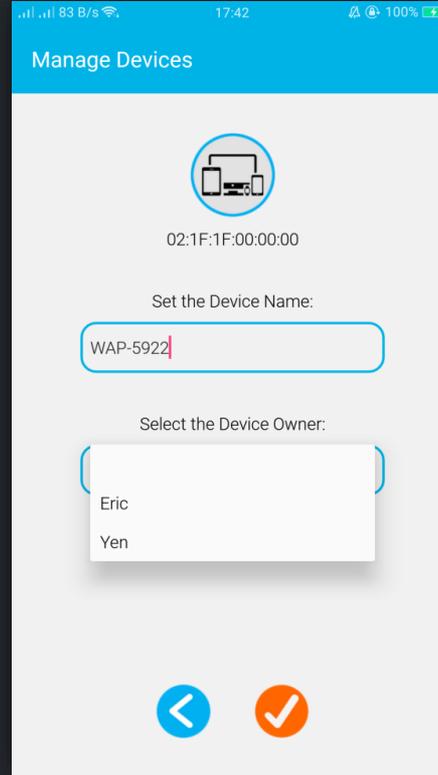

You can enter Management to add more user of your home member.

Harmony cloud MESH

8. Change Preferred Device name and select device owner.

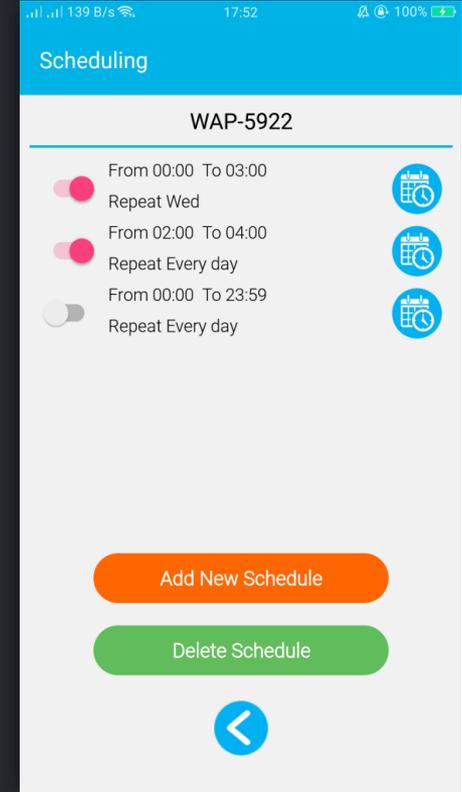

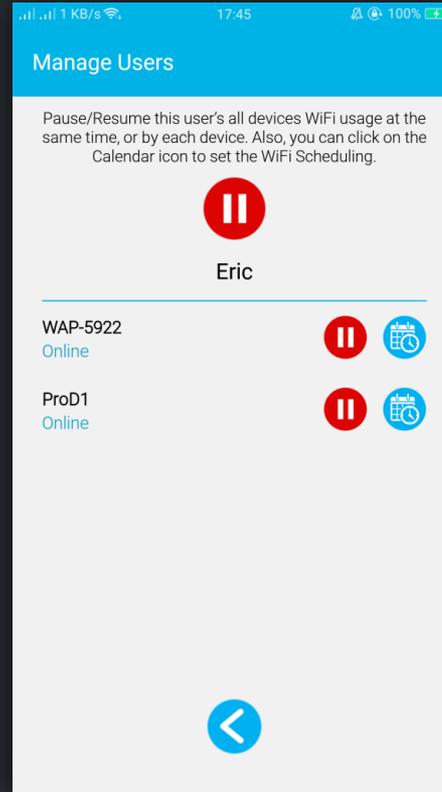

After modify device name, in this page showing each device related information.

Harmony cloud MESH

9. Add schedule for each user.

In management User, you can add user schedule for connecting Wi-Fi.
